A.	Petition - QR Codes on Hobart's Heritage Buildings - Brian Corr .....	8

# Petition

Date: 06 August 2022

To the Lord Mayor, Elected Members and the Chief Executive Officer of the Hobart City Council, the petition of the undersigned is submitted for your attention.

**State the subject matter:**

Establishment of the Rwandan Tutsi Genocide Memorial

**State the action sought by the petitioners:** We the undersigned citizens request that the Council supports the establishment of a Memorial to the Rwandan Tutsi Genocide. The memorial would be an Australian first and also be a place to educate the community on themes of peace and anti-racism.

The proposed memorial design is a modest size, encompasses accessible public seating and will make a meaningful contribution to a Hobart public space. The project would seek external funding and so the request to the Council is an in-kind contribution in the form of a small parcel of a suitable land.

**Total number of signatories to the petition:** 100

Please Note: To be a valid petition:

The full printed name, address and signature of the person lodging the petition must be provided.

**Name:** The Rwandan Australian Friendship Association Inc (RAFA)

**Postal address:** 2 Aruma Street, Mornington TAS 7018

**Signature:** Aubert Ruzigandekwe - President of RAFA

Elected Member Use Only:  
As presented to Council by Alderman/Councillor .....  
Signed:.....

**Local Government Act 1993 PART 6 - Petitions, polls and public meetings**

**57 Petitions**

- (1) A person may lodge a petition with a council by presenting it to a councillor or the general manager.

# Petition

The subject matter:

Establishment of the Rwandan Tutsi Genocide Memorial

The Rwandan community in Hobart is requesting a site to build a Memorial of the Rwandan Tutsi genocide, which will help the Rwandan community and other communities with similar past experience, in their journey of healing and also be a space to educate on the themes of peace and anti-racism.

- (2) A person lodging a petition is to ensure that the petition contains – (a) a clear and concise statement identifying the subject matter and the action requested; and
- (b) in the case of a paper petition, a heading on each page indicating the subject matter; and
  - (c) in the case of a paper petition, a brief statement on each page of the subject matter and the action requested; and
  - (d) a statement specifying the number of signatories; and
  - (e) at the end of the petition –
    - (i) in the case of a paper petition, the full name, address and signature of the person lodging the petition; and
    - (ii) in the case of an electronic petition, the full name and address of the person lodging the petition and a statement by that person certifying that the statement of the subject matter and the action requested, as set out at the beginning of the petition, has not been changed.
- (3) In this section – electronic petition means a petition where the petition is created and circulated electronically and the signatories have added their details by electronic means;
- paper petition means a petition where the petition is created on paper which is then circulated and to which the signatories have added their details directly onto the paper;
- petition means a paper petition or electronic petition;
- signatory means –
- (a) in the case of a paper petition, a person who has added his or her details to the paper petition and signed the petition; and
  - (b) in the case of an electronic petition, a person who has added his or her details to the electronic petition.

## 58 Tabling petition

- (1) A councillor who has been presented with a petition is to – (a) ...
  - (b) forward it to the general manager within 7 days after receiving it.
- (2) A general manager who has been presented with a petition or receives a petition under subsection (1)(b) is to table the petition at the next ordinary meeting of the council.

State the subject matter:

T:\Council Support\Petition\Petition Form and LGA.docx

# Petition

Establishment of the Rwandan Tutsi Genocide Memorial

The Rwandan community in Hobart is requesting a site to build a Memorial of the Rwandan Tutsi genocide, which will help the Rwandan community and other communities with similar past experience, in their journey of healing and also be a space to educate on the themes of peace and anti-racism.

- (3) A petition is not to be tabled if –
  - (a) it does not comply with section 57 ; or
  - (b) it is defamatory; or
  - (c) .any action it proposes is unlawful.
- (4) The general manager is to advise the lodger of a petition that is not tabled the reason for not tabling it within 21 days after lodgement.

## 59 Petitions seeking public meetings

- (1) A petition under section 57 may request that a council hold a public meeting regarding the subject matter of the petition.
- (2) A council must hold a public meeting if the petition complies with section 57 and it is signed by whichever is the lesser of the following: (a) 5% of the electors in the municipal area; (b) 1 000 of those electors.
- (3) A petition that requests a public meeting is not to be made in respect of any matter relating to rates and charges in Part 9 if those rates or charges have been made for the current financial year.

## 60 Action on petition

- (1) The general manager, by notice in writing to the person who lodged the petition, is to –
  - (a) advise whether the petition complies with section 59 , if it seeks a public meeting; and
  - (b) give reasonable notice of when the council is to consider the petition.
- (2) Within 42 days after the tabling of the petition –
  - (a) the general manager is to advise the council at a council meeting whether the petition complies with section 59 , if applicable; and
  - (b) the council, at that meeting, is to determine any action to be taken in respect of the petition.
- (3) If the petition complies with section 59 , or the council otherwise resolves to hold a public meeting regarding the subject matter of the petition, the council, within 30 days after the meeting referred to in subsection (2) , is to hold a public meeting to discuss the subject matter of the petition.
- (4) The council is to record in the minutes of the meeting referred to in subsection (2) –

State the subject matter:

T:\Council Support\Petition\Petition Form and LGA.docx

## Establishment of the Rwandan Tutsi Genocide Memorial

The Rwandan community in Hobart is requesting a site to build a Memorial of the Rwandan Tutsi genocide, which will help the Rwandan community and other communities with similar past experience, in their journey of healing and also be a space to educate on the themes of peace and anti-racism.

- (a) the subject matter of the petition; and
- (b) the number of signatories to the petition.

### 60A Public meetings and submissions

- (1) Before holding a public meeting under section 59 or section 60(3) , a council, in a notice publicly displayed, must –
  - (a) state the date on which, and the time and place at which, the public meeting is to be held; and
  - (b) state the details of the subject matter; and
  - (c) invite written submissions in relation to the subject matter to be lodged with the general manager.
- (2) A copy of the notice under subsection (1) is to be –
  - (a) published on at least 2 occasions in a daily newspaper circulating in the municipal area; and
  - (b) sent to the person who lodged the petition.
- (3) A submission must be lodged within 21 days after the first publication of the notice.
- (4) Any submission received is to be summarised by the general manager in a document, copies of which are to be made available to those attending the public meeting.
- (5) The minutes of the next ordinary meeting of the council following the public meeting are to record –
  - (a) a summary of any submission received under this section; and (b) any decision made at a public meeting held under this section.

Heritage Petition to Council: Reasons & Benefits

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

- We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

Heritage Petition to Council: Reasons &amp; Benefits

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

Heritage Petition to Council: Reasons &amp; Benefits

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

- Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

- This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

Our Heritage Petition:

- To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

- We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

Heritage Petition to Council: Reasons &amp; Benefits

- QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

- It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

**Your Name::** Gay Jackson

**Your Email::** Ja\_ren@yahoo.com.au

**Additional Comments, if any::** I was born & grew up in Hobart. Since leaving to join an airline I have returned every 3 months in 50+ years. I love my home town. Love its history & it's uniqueness. After travelling the world & enjoying different cultures I realised how important our own culture is. Hobart will be changed for the worse forever. Do we want that. Can't we have a city with its uniqueness shining thru. People, wether tourist or locals love our city the way it is. Why spoil it. Once spoiled you can't go back. Gay Jackson . A Rose Bay High student.

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

## Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

**Your Name::** Gilbert Donnelly  
**Your Email::** gus-donnelly@aapt.net.au  
**Additional Comments, if any::** Excellent idea, fully supported

**Heritage Petition to Council: Reasons & Benefits**

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

- Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

- This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

## Heritage Petition to Council: Reasons &amp; Benefits

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

## Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

- It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.
- Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

- This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

**Our Heritage Petition:**

- To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.
- We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.
- We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

**Heritage Petition to Council: Reasons & Benefits**

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

Heritage Petition to Council: Reasons &amp; Benefits

- QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

- It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.
- Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

- We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

**Your Name::** Andrew MacFie  
**Your Email::** macfie22@gmail.com  
**Additional Comments, if any::** Council/developers- stop damaging our heritage history with deplorably designed high rise ugly concrete slab monstrosities. A. MacFie

**Your Name::** Kaylene Westmore**Your Email::** kaylenew2605@gmail.com**Additional Comments, if any::** I support this excellent initiative. As a local but not Tasmanian I would definitely use this resource to expand my understanding of local history and points of interest. However, could we please ensure better Wi-Fi coverage of the areas where the codes are placed. This will enable more equitable access for all. Not just for those with data on their phones or the right phone provider. Thank you.

Heritage Petition to Council: Reasons &amp; Benefits

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

- It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.
- Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

- This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

Our Heritage Petition:

- To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.
- We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

**Our Heritage Petition:**

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

**Heritage Petition to Council: Reasons & Benefits**

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

- It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.
  - Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.
  - Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

**Our Heritage Petition:**

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

- We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

**Heritage Petition to Council: Reasons & Benefits**

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

**Our Heritage Petition:**

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

### Heritage Petition to Council: Reasons & Benefits

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

### Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

**Heritage Petition to Council: Reasons & Benefits**

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

**Our Heritage Petition:**

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

Heritage Petition to Council: Reasons & Benefits

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

**Your Name::** Gregor Watson  
**Your Email::** watson.gregor@gmail.com  
**Additional Comments, if any::** We should protect our heritage for its intrinsic values, and part of any protection strategy is education. Adding QR codes is a very useful strategy in this respect. Another well-proven way of protecting things of importance is to improve their tourism potential as this gives them monetary value which enables them to compete against the short-term financial gains being pushed by proponents of inappropriate developments. In this respect too, QR codes would be a very helpful tool.

The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

**Our Heritage Petition:**

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

**Your Name::** Paul Turvey  
**Your Email::** paul.turvey@gmail.com  
**Additional Comments, if any::** This is such a great idea and will certainly allow greater access to our wonderful heritage with very little effort but greater convenience.

**Heritage Petition to Council: Reasons & Benefits**

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Heritage Petition to Council: Reasons &amp; Benefits

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

**Your Name::** Patricia Byers  
**Your Email::** petpad.byers@gmail.com  
**Additional Comments, if any::** Hobart's history is interesting, but many newcomers like me (I've only been here since 1968) have found it difficult to discover who the people were who formed our community, shaped the city, etc. Who are our streets named after? Which places and buildings were significant as the city evolved? Having QR Codes would help us "locals" as well as visitors to our lovely capital, better understand why places need to be protected when their integrity and significance comes under threat. There is so much basic information

**Your Name::** Preston Clothier  
**Your Email::** preston.clothier@bigpond.com  
**Additional Comments, if any::** Hobart is a beautiful city, not quite as well preserved as Launceston but the setting is better. Preserving the character and charm of Hobart by resisting rampant development is something the community should strive for. In Europe - Paris, Prague, Bergen and Florence come to mind. In Hobart we can offer culture, food, architecture and wonderful scenery, that's what is worth preserving.

Heritage Petition to Council: Reasons &amp; Benefits

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

**Your Name::** Diane Hoggins  
**Your Email::** dianehoggins@yahoo.com.au  
**Additional Comments, if any::** This is a super idea!!!

**Your Name::** Dr David Young

**Your Email::** david.young31@yahoo.com

**Additional Comments, if any::** I worked for Heritage Tasmania as a Senior Research Officer for five years. I think that this is a good idea, but for it to work, it is probable that the Tasmanian Heritage Council's cooperation would be required. I suggest that this should be sought prior to deciding how to action the petition. I think it likely that the THC would support the idea.

**Heritage Petition to Council: Reasons & Benefits**

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

**Our Heritage Petition:**

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

**Your Name::** Elizabeth Gleeson  
**Your Email::** elizabethg504@bigpond.com  
**Additional Comments, if any::** This is a very worthy petition. QR codes would be fantastic for promoting the city to locals and tourists alike. I have seen this idea working very successfully in galleries and cities in Europe. A positive idea which I recommend the Council to adopt.

## Heritage Petition to Council: Reasons &amp; Benefits

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

## Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

Heritage Petition to Council: Reasons & Benefits

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

Heritage Petition to Council: Reasons &amp; Benefits

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

**Your Name::** Lynette Tringrove  
**Your Email::** lynette.tringrove@icloud.com  
**Additional Comments, if any::** I thoroughly endorse this concept. We should value and respect our history, including our environment.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

## Heritage Petition to Council: Reasons &amp; Benefits

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

**Heritage Petition to Council: Reasons & Benefits**

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

**Heritage Petition to Council: Reasons & Benefits**

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

**Our Heritage Petition:**

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

**Our Heritage Petition:**

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

**Your Name::** Donald Knowler  
**Your Email::** knowler@netspace.net.au  
**Additional Comments, if any::** anything to preserve our historic buildings is a good step

**Heritage Petition to Council: Reasons & Benefits**

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

**Our Heritage Petition:**

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

Heritage Petition to Council: Reasons &amp; Benefits

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

- We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.

**Your Name::** Chris Woods**Your Email::** mtvic1@bigpond.com**Additional Comments, if any::** I think it's a great idea as Hobart has so many historic buildings. I'm sure people would like to be able to get an idea of when a particular building was built and what it's been used for over time. Some have plaques or interpretive signs but they do get damaged or fade, and are costly to produce, whereas a QR code is virtually cost-free and the information can easily be updated or added to.

**Your Name::** George Smith  
**Your Email::** geosmit18@yahoo.com.au  
**Additional Comments, if any::** Our town planners should have to undertake heritage training and architectural history because they don't seem to understand what they are destroying through ignorance. Many Australians want to go to Europe to visit culture icons. If they had our attitudes they wouldn't exist. We have already destroyed a lot of our heritage giving free range to developers, who make money and move on, leaving behind ugliness. Once lost it can only make us poorer.

Heritage Petition to Council: Reasons &amp; Benefits

QR Codes are here to stay. They're everywhere. In shop windows and advertisements. On packaging and business cards. QR stands for "Quick Response". We all learned to use them because of Covid.

Imagine if we put a QR Code (plastic, metal, ceramic) on heritage buildings and places of interest in Hobart, including streets, statues, parks etc. and these QR Codes took you to a web-page that explained the history of the item. The City of Hobart web-site already has a huge amount of data that could be used.

It's the modern answer to those dull plaques that say: "On this spot in 1823, something happened." The web-page would give context and detail, bringing the item alive.

Imagine the value to our tourism industry; a visitor just scans the QR Code for a quick link to the online information. Also, many locals, all ages, have a great interest and pride in our city.

Physical guides and maps become outdated but the information online would be improved and expanded as required (think of the Crowther statue and its story).

This idea is not new, already well-used in differing ways in a number of cities, mostly working with Wikipedia to present the information in one of 25 languages, automatically detected on the user's phone.

Our Heritage Petition:

To the Lord Mayor, Aldermen, Councillors, and CEO of the Hobart City Council, this petition is submitted for your attention.

We, your petitioners, ask the City to investigate the option of having QR Codes on Hobart's heritage buildings and places/items of interest, possibly including streets, statues, parks etc. with these QR Codes linked to a web-page explaining the history of the item.

We ask that a report come to Council with details including feasibility, setup and ongoing costs, timeline, possible grants etc with a recommendation to Council.
